

Durable Medical Equipment (DME)

Service Coordination Request Process

Superior HealthPlan has outlined the Durable Medical Equipment (DME) Service Coordination Request Process to highlight the importance of communication between providers and Superior's Service Coordination department. Superior's Service Coordinators provide a specialized level of care coordination that includes, but is not limited to, coordinating with the member's PCP, specialists and Long-Term Service and Supports (LTSS) providers. This ensures the member's health and safety needs are met in the least restrictive setting.

If you need assistance completing request for services or for more information, please contact Superior's Service Coordination department at:
