

POLICY AND PROCEDURE

POLICY NAME: tisagenlecleucel (Kymriah®)	POLICY ID: TX.PHAR.58
BUSINESS UNIT: Superior HealthPlan	FUNCTIONAL AREA: Pharmacy
EFFECTIVE DATE: 4/8/2019	PRODUCT(S): STAR, STAR Kids, STAR Health, STAR Plus, CHIP, CHIP Perinate
REVIEWED/REVISED DATE: 4/17/2019, 9/19/2019, 9/14/2020, 10/2021, 7/31/2022, 9/1/2022, 8/18/2023	
REGULATOR MOST RECENT APPROVAL DATE(S): N/A	

POLICY STATEMENT:

The purpose of this Clinical Policy is to provide a guide to medical necessity reviews for tisagenlecleucel (Kymriah®).

PURPOSE:

It is the policy of Superior HealthPlan (SHP) and Centene Pharmacy Services (CPS) to follow state guidance for medical necessity review of tisagenlecleucel (Kymriah®).

Consistent with the regulation at 42 CFR Section 438.210 and 42 CFR Section 457.1230(d), services covered under managed care contracts, including clinician-administered drugs, must be furnished in an amount, duration, and scope that is no less than the amount, duration, and scope for the same services specified in the state plan. While MCOs may place appropriate limits on drugs, MCOs may not use a standard for determining medical necessity that is more restrictive than what is used in the state plan, i.e., developed by the Vendor Drug Program. For example, if a member is denied a clinician administered drug in managed care because of the MCO's prior authorization criteria but would have received the drug under the criteria specified in the state plan, then the MCO's prior authorization criteria would violate the amount, duration, and scope requirements cited above. HHSC intends to amend the Managed Care Contracts at the next opportunity to include this requirement. This same standard applies to CHIP formulary and CAD coverage.

Refer to the Outpatient Drug Services Handbook of the Texas Medicaid Provider Procedure Manual for more details on the clinical policy and prior authorization requirements.

This medication is a non-risk based (NRB) payment drug and should follow state guidance for medical necessity review for Medicaid/CHIP due to the manner in which it is reimbursed. All determinations will be performed by an SHP Medical Director. A pharmacy clinician will review the prior authorization request and make a recommendation to the Medical Director but will not make the ultimate determination on any case.

Additionally, this medication is a precision drug. Centene's Precision Drug Action Committee (PDAC) creates a standardized approach for Centene to manage precision drugs and the associated costs for their administration, prior to members presenting with a request for one of these agents. All precision drug requests or potential requests must be reported to the PDAC for tracking, regardless of whether agents are carved out, passed through, etc. All precision drug medical necessity determinations will be supported by PDAC UM recommendation, utilizing specialist input as directed and allowed by turnaround times.

SCOPE:

This policy applies to Centene Pharmacy Services, Pharmacy Department, Medical Directors, Claims

DEFINITIONS:

NRB = non-risk based

PDAC = Precision Drug Action Committee

UM = Utilization Management

CPS = Centene Pharmacy Services

SHP = Superior HealthPlan

POLICY:

It is the policy of Superior HealthPlan and Centene Pharmacy Services to follow state guidance for medical necessity review of tisagenlecleucel (Kymriah®).

Description:

Tisagenlecleucel (Kymriah®) is a CD19-directed genetically modified autologous T-cell immunotherapy (containing human cells modified with a lentivirus) in which a patient's T-cells are reprogrammed with a transgene encoding a chimeric antigen receptor (CAR) to identify and eliminate CD19-expressing malignant and normal cells.

TX.PHAR.58_Tisagenlecleucel_(Kymriah)

FDA Approved Indications:

Tisagenlecleucel (Kymriah) is indicated to treat the following:

- Clients who are 25 years of age or younger with B-cell precursor acute lymphoblastic leukemia (ALL) that is refractory or in second or later relapse.
- Adult clients with relapsed or refractory large B-cell lymphoma after two or more lines of systemic therapy (including diffuse large B-cell lymphoma (DLBCL), not otherwise specified, high grade B-cell lymphoma and DLBCL arising from follicular lymphoma)
- Adult clients with relapsed or refractory follicular lymphoma (FL) after two or more lines of systemic therapy

Formulations:

Available as a single-dose unit infusion bag: frozen suspension of genetically modified autologous T-cells labeled for the specific recipient.

The procedure code Q2042 (used for Kymriah®) will be limited to once per lifetime, by any provider. If the code is updated in the future it will still be limited to once per lifetime. Certified healthcare facilities must enroll and comply with the Risk Evaluation and Mitigation Strategies (REMS) requirements for this drug.

There are only 10 centers in Texas authorized to provide this drug due to REMS (Risk Evaluation and Mitigation Strategy) requirements for the drug. Medical Directors should attempt to direct to a participating (PAR) provider. On a case-by-case basis, said Medical Director may make an exception outside of a PAR provider but will require a single case agreement (SCA). The approved centers are:

- St. David's Healthcare (Austin)
- Baylor Charles A. Sammons Cancer Center (Dallas)
- UT Southwestern Simmons Comprehensive Cancer Center (Dallas)
- Medical City (Dallas)
- Texas Transplant Institute (San Antonio)
- The University of Texas MD Anderson Cancer Center (Houston)
- Houston Methodist (Houston)
- Cook Children's Medical Center (Dallas)
- Children's Medical Center (Dallas)
- Texas Children's Hospital (Houston)

PROCEDURE:

Provider must submit documentation (which may include office chart notes and lab results) supporting that member has met all approval criteria.

I. Initial Approval Criteria:

A. B-cell Precursor Acute Lymphoblastic Leukemia (second relapse or refractory):

1. A medical director is required to review and approve or deny all requests. A pharmacist will make a recommendation on the prior authorization but ultimate determination will be made by the medical director only.
2. Medical necessity determinations will be supported by PDAC UM recommendation. The CPS or SHP pharmacy clinician will review the UM recommendation with the prior authorization request for clinical appropriateness and make a recommendation to the SHP medical director but will not make the ultimate determination on any case.
3. The client is 25 years of age or younger.
4. The client has a histologically confirmed diagnosis of B-cell acute lymphoblastic leukemia.

Applicable Diagnosis Codes		
C9100	C9101	C9102

5. The client has a confirmed CD-19 tumor expression.
6. The disease is refractory or in second or later relapse.

7. The client has not received prior CAR-T therapy.

8. The health-care facility has enrolled in the Kymriah® Risk Evaluation and Mitigation Strategies and training has been given to the provider on the management of cytokine release syndrome and neurological toxicities. Currently there are only 10 facilities which may provide this drug under these parameters and these are:

- St. David’s Healthcare (Austin)
- Baylor Charles A. Sammons Cancer Center (Dallas)
- UT Southwestern Simmons Comprehensive Cancer Center (Dallas)
- Medical City (Dallas)
- Texas Transplant Institute at Methodist Hospital (San Antonio)
- The University of Texas MD Anderson Cancer Center (Houston)
- Houston Methodist (Houston)
- Cook Children’s Medical Center (Dallas)
- Children’s Medical Center (Dallas)
- Texas Children’s Hospital (Houston)

9. If the facility is non-PAR the medical director will redirect to a PAR provider. On a case by case basis, said Medical Director may make an exception outside of a PAR provider but will require a single case agreement (SCA). Once the case is determined, the pharmacy team via pharmacy management will work with the SCA team to assist on the SCA. This should be the exception and not the rule as a PAR facility/provider is preferable. The pharmacist supporting the medical director will contact pharmacy management to start the SCA process.

Approval duration: Only 1 dose per lifetime will be provided on this drug regardless of Provider.

B. Diffuse Large B-cell Lymphoma (relapsed or refractory):

1. A medical director is required to review and approve or deny all requests. A pharmacist will make a recommendation on the prior authorization but ultimate determination will be made by the medical director only.
2. Medical necessity determinations will be supported by PDAC UM recommendation. The CPS or SHP pharmacy clinician will review the UM recommendation with the prior authorization request for clinical appropriateness and make a recommendation to the SHP medical director but will not make the ultimate determination on any case.
3. The client is 18 years of age or older.
4. The client has a histologically confirmed diagnosis of large B-cell lymphoma (a, b, or c)
 - a. Diffuse large B-cell lymphoma, not otherwise specified
 - b. High grade B-cell lymphoma
 - c. Diffuse large B-cell lymphoma arising from follicular lymphoma

Applicable Diagnosis Codes						
C8330	C8331	C8332	C8333	C8334	C8335	C8336
C8337	C8338	C8339				

5. The client must have relapsed or refractory disease defined as progression after two or more lines of systemic therapy (which may or may not include therapy supported by autologous stem cell transplant).
6. The client does not have primary central nervous system lymphoma.
7. The client has not received prior CD-19 directed CAR-T therapy.
8. The health-care facility has enrolled in the Kymriah® Risk Evaluation and Mitigation Strategies and training has been given to the provider on the management of cytokine release syndrome and neurological toxicities. Currently there are only 10 facilities which may provide this drug under these parameters and these are:

- St. David’s Healthcare (Austin)
- Baylor Charles A. Sammons Cancer Center (Dallas)

- UT Southwestern Simmons Comprehensive Cancer Center (Dallas)
- Medical City (Dallas)
- Texas Transplant Institute at Methodist Hospital (San Antonio)
- The University of Texas MD Anderson Cancer Center (Houston)
- Houston Methodist (Houston)
- Cook Children’s Medical Center (Dallas)
- Children’s Medical Center (Dallas)
- Texas Children’s Hospital (Houston)

9. If the facility is non-PAR the medical director will redirect to a PAR provider. On a case by case basis, said Medical Director may make an exception outside of a PAR provider but will require a single case agreement (SCA). Once the case is determined, the pharmacy team via pharmacy management will work with the SCA team to assist on the SCA. This should be the exception and not the rule as a PAR facility/provider is preferable. The pharmacist supporting the medical director will contact pharmacy management to start the SCA process.

Approval duration: Only 1 dose per lifetime will be provided on this drug regardless of Provider.

C. Follicular Lymphoma (relapsed or refractory):

1. A medical director is required to review and approve or deny all requests. A pharmacist will make a recommendation on the prior authorization but ultimate determination will be made by the medical director only.
2. Medical necessity determinations will be supported by PDAC UM recommendation. The CPS or SHP pharmacy clinician will review the UM recommendation with the prior authorization request for clinical appropriateness and make a recommendation to the SHP medical director but will not make the ultimate determination on any case.
3. The client 18 years of age or older.
4. The client has histologically confirmed diagnosis of follicular lymphoma.

C8290	C8291	C8292	C8293	C8294	C8295	C8296	C8297
C8298	C8299						

5. The client must have relapsed or refractory disease defined as progression after two or more lines of systemic therapy.
6. The client does not have primary central nervous system lymphoma/disease.
7. The client does not have an active infection or inflammatory disorder.
8. The client has not received prior CD-19 directed CAR-T therapy.
9. The health-care facility has enrolled in the Kymriah® Risk Evaluation and Mitigation Strategies and training has been given to the provider on the management of cytokine release syndrome and neurological toxicities. Currently there are only 10 facilities which may provide this drug under these parameters and these are:

- St. David's Healthcare (Austin)
- Baylor Charles A. Sammons Cancer Center (Dallas)
- UT Southwestern Simmons Comprehensive Cancer Center (Dallas)
- Medical City (Dallas)
- Texas Transplant Institute (San Antonio)
- The University of Texas MD Anderson Cancer Center (Houston)
- Houston Methodist (Houston)
- Cook Children's Medical Center (Dallas)
- Children's Medical Center (Dallas)
- Texas Children's Hospital (Houston)

10. If the facility is non-PAR the medical director will redirect to a PAR provider. On a case by case basis, said Medical Director may make an exception outside of a PAR provider but will require a single case agreement (SCA). Once the case is determined, the pharmacy team via pharmacy management will work with the SCA team to assist on the SCA. This should be the exception and not the rule as a PAR facility/provider is preferable. The pharmacist supporting the medical director will contact pharmacy management to start the SCA process.

Approval duration: Only 1 dose per lifetime will be provided on this drug regardless of Provider.
