3M Health Information Systems

Superior HealthPlan strives to provide high quality and care for members as well as improved service to providers. Superior has partnered with 3M to launch 3M Health Information Systems (HIS) – a leading provider of data analytics and business intelligence – for Superior physicians at no cost.

HIS features a user-friendly dashboard, that provides actionable information on Superior members. This enables providers to develop and implement data-driven strategies for improving clinical performance, outcomes and health care costs.

Benefits

Track incentive based programs.

Monitor patient's profiles for ER visits.

Access patient profiles cost of care information, 3M Health Information Systems (HIS) report library and other features that build the framework for careful and thoughtful clinic and patient plans.

Receive reports on the total cost of care, potentially preventable events, utilization and a Value Index Score (VIS), a single score that quantifies the quality of care. The VIS incorporates risk adjustment to remove the variability of sickness of the patient pool and provide insight on the value of care provided.
