

Clinical Policy: Doxycycline Hyclate (Acticlate, Doryx), Doxycycline (Oracea)

Reference Number: CP.PMN.79

Effective Date: 06.01.17 Last Review Date: 05.20

Line of Business: Commercial, HIM, Medicaid Revision Log

See <u>Important Reminder</u> at the end of this policy for important regulatory and legal information.

Description

Doxycycline (Acticlate[®], Doryx[®], Doryx[®] MPC, Oracea[®]) is a tetracycline-class drug.

FDA Approved Indication(s)

Acticlate and Doryx/Doryx MPC are indicated for:

- Rickettsial infections
- Sexually transmitted infections
- Respiratory tract infections
- Specific bacterial infections
- Ophthalmic infections
- Anthrax, including inhalational anthrax (post-exposure)
- Alternative treatment for selected infections when penicillin is contraindicated
- Adjunctive therapy in acute intestinal amebiasis and severe acne
- Prophylaxis of malaria

Oracea is indicated for the treatment of only inflammatory lesions (papules and pustules) of rosacea in adult patients. No meaningful effect was demonstrated for generalized erythema (redness) of rosacea.

Limitation(s) of use: The Oracea formulation of doxycycline has not been evaluated in the treatment or prevention of infections. Oracea should not be used for treating bacterial infections, providing antibacterial prophylaxis, or reducing the numbers or eliminating microorganisms associated with any bacterial disease. To reduce the development of drug-resistant bacteria as well as to maintain the effectiveness of other antibacterial drugs, Oracea should be used only as indicated. Efficacy of Oracea beyond 16 weeks and safety beyond 9 months have not been established. Oracea has not been evaluated for the treatment of the erythematous, telangiectatic, or ocular components of rosacea.

Policy/Criteria

Provider must submit documentation (such as office chart notes, lab results or other clinical information) supporting that member has met all approval criteria.

It is the policy of health plans affiliated with Centene Corporation[®] that Acticlate, Doryx, Doryx MPC, and Oracea are **medically necessary** when the following criteria are met:

I. Initial Approval Criteria

A. Rosacea (must meet all):

- 1. Diagnosis of rosacea with inflammatory lesions (papules and pustules);
- 2. Request is for Oracea;
- 3. Age \geq 18 years;
- 4. Medical justification supports inability to use immediate-release doxycycline (e.g., member experienced clinically significant adverse effects or has contraindication(s) to the excipients in immediate-release doxycycline);
- 5. Failure of ≥ 4-week trial of one additional preferred oral tetracycline antibiotic (e.g., immediate-release minocycline), unless contraindicated or clinically significant adverse effects are experienced;
- 6. Dose does not exceed 40 mg (1 capsule) per day.

Approval duration: 16 weeks

B. Acne Vulgaris (must meet all):

- 1. Diagnosis of acne vulgaris;
- 2. Request is for Acticlate, Doryx, or Doryx MPC;
- 3. Medical justification supports inability to use immediate-release doxycycline (e.g., member experienced clinically significant adverse effects or has contraindication(s) to the excipients in immediate-release doxycycline);
- Failure of a ≥ 4-week trial of one additional preferred oral tetracycline antibiotic (e.g., immediate-release minocycline), unless clinically significant adverse effects are experienced;
- 5. Dose does not exceed:
 - a. Acticlate, Doryx: 300 mg per day;
 - b. Doryx MPC: 240 mg per day.

Approval duration: 3 months

C. Prophylaxis of Malaria (must meet all):

- 1. Prescribed for malaria prophylaxis;
- 2. Request is for Acticlate, Doryx, or Doryx MPC;
- 3. Medical justification supports inability to use immediate-release doxycycline (e.g., member experienced clinically significant adverse effects or has contraindication(s) to the excipients in immediate-release doxycycline);
- 4. Dose does not exceed:
 - a. Acticlate, Doryx: 100 mg per day;
 - b. Doryx MPC: 120 mg per day.

Approval duration: 4 months or duration of travel and up to 4 weeks after member leaves the malarious area, whichever is less

D. FDA-Approved Acute Infection Indications for Acticlate, Doryx/Doryx MPC (must meet all):

- 1. Prescribed for the treatment of one of the following conditions or diseases (*refer to Appendix D for conditions or diseases that are applicable*):
 - a. Rickettsial infections:
 - b. Sexually transmitted infections;
 - c. Respiratory tract infections;
 - d. Specific bacterial infections;

- e. Ophthalmic infections;
- f. Anthrax, including inhalational anthrax (post-exposure);
- g. Selected infections when penicillin is contraindicated;
- h. Acute intestinal amebiasis;
- 2. Request is for Acticlate, Doryx, or Doryx MPC;
- 3. Medical justification supports inability to use immediate-release doxycycline (e.g., member experienced clinically significant adverse effects or has contraindication(s) to the excipients in immediate release doxycycline);
- 4. Failure of one additional preferred oral tetracycline antibiotic (e.g., immediate-release minocycline), unless clinically significant adverse effects are experienced or the other preferred tetracycline antibiotics are not indicated for the member's diagnosis;
- 5. Dose does not exceed:
 - a. Acticlate, Doryx: 300 mg per day;
 - b. Doryx MPC: 240 mg per day.

Approval duration: 60 days or duration of request, whichever is less

E. Other diagnoses/indications

1. Refer to the off-label use policy for the relevant line of business if diagnosis is NOT specifically listed under section III (Diagnoses/Indications for which coverage is NOT authorized): CP.CPA.09 for commercial, HIM.PHAR.21 for health insurance marketplace, and CP.PMN.53 for Medicaid.

II. Continued Therapy

A. Rosacea (must meet all):

- 1. Currently receiving medication via Centene benefit or member has previously met initial approval criteria;
- 2. Request is for Oracea;
- 3. Member is responding positively to therapy;
- 4. Member has not received Oracea daily for > 16 weeks;
- 5. If request is for a dose increase, new dose does not exceed 40 mg (1 capsule) per day.

Approval duration: up to 16 weeks of treatment (total)

B. Acne Vulgaris (must meet all):

- 1. Currently receiving medication via Centene benefit or member has previously met initial approval criteria;
- 2. Request is for Acticlate, Doryx/Doryx MPC;
- 3. Member is responding positively to therapy;
- 4. If request is for a dose increase, new dose does not exceed:
 - a. Acticlate, Doryx: 300 mg per day;
 - b. Doryx MPC: 240 mg per day.

Approval duration: 3 months

C. Prophylaxis of Malaria and FDA-Approved Acute Infection Indications for Acute Infections

1. Re-authorization for Acticlate, Doryx/Doryx MPC is not permitted. Members must meet the initial approval criteria.

Approval duration: Not applicable

D. Other diagnoses/indications (must meet 1 or 2):

1. Currently receiving medication via Centene benefit and documentation supports positive response to therapy.

Approval duration: Duration of request or 6 months (whichever is less); or

2. Refer to the off-label use policy for the relevant line of business if diagnosis is NOT specifically listed under section III (Diagnoses/Indications for which coverage is NOT authorized): CP.CPA.09 for commercial, HIM.PHAR.21 for health insurance marketplace, and CP.PMN.53 for Medicaid.

III. Diagnoses/Indications for which coverage is NOT authorized:

A. Non-FDA approved indications, which are not addressed in this policy, unless there is sufficient documentation of efficacy and safety according to the off label use policies – CP.CPA.09 for commercial, HIM.PHAR.21 for health insurance marketplace, and CP.PMN.53 for Medicaid or evidence of coverage documents.

IV. Appendices/General Information

Appendix A: Abbreviation/Acronym Key FDA: Food and Drug Administration

Appendix B: Therapeutic Alternatives

This table provides a listing of preferred alternative therapy recommended in the approval criteria. The drugs listed here may not be a formulary agent for all relevant lines of business and may require prior authorization.

Drug Name	rug Name Dosing Regimen		
		Maximum Dose	
doxycycline	Acne vulgaris, adults: 100 mg PO every 12 hrs on	Varies	
(Vibramycin®)	day 1, followed by a maintenance dose of 100 PO		
	QD		
	Acne vulgaris, children 8 years and older and		
	adolescents weighing less than 45 kg: 2.2		
	mg/kg/dose PO every 12 hours on day 1, then 2.2 mg/kg/dose PO QD		
	ling/kg/dose FO QD		
	Rosacea: 40 mg or 50 mg PO QAM		
	Malaria (off label): 100 mg PO BID for 7 days		
	See Full Prescribing Information for additional		
	indication specific dosage information.		
minocycline	Acne vulgaris, adults: 200 mg PO initially, then	200 mg/day	
(Minocin)	100 mg PO every 12 hours. Alternatively, if more		
	frequent oral doses are preferred, 100 to 200 mg		
	PO initially, then 50 mg PO every 6 hours.		

Drug Name	Dosing Regimen	Dose Limit/ Maximum Dose
	Acne vulgaris, children ≥ 8 years and adolescents: 4 mg/kg PO (max: 200 mg) initially, then 2 mg/kg/dose PO every 12 hours (max: 100 mg/dose) as adjunctive therapy See Full Prescribing Information for additional	
tetracycline	indication specific dosage information Acne vulgaris, adult: 1 gram PO in divided doses, then decrease slowly to 125 to 500 mg PO daily or every other day.	Varies
	Acne vulgaris, children≥ 9 years and adolescents: 1 g/day PO in divided doses, then decrease slowly to 125 to 500 mg PO QD or QOD	
	Rosacea: 250 to 1,500 mg PO QD Malaria (off label): 250 mg PO four times daily	
	for 7 days. See Full Prescribing Information for additional indication specific dosage information.	

Therapeutic alternatives are listed as Brand name[®] (generic) when the drug is available by brand name only and generic (Brand name[®]) when the drug is available by both brand and generic.

Appendix C: Contraindications/Boxed Warnings

- Contraindication(s): hypersensitivity to doxycycline or other tetracyclines.
- Boxed warning(s): none reported

Appendix D: Other FDA-Approved Acute Infection Indications for Doryx/Doryx MPC and Acticlate

FDA-approved indications	Applicable conditions or diseases
Rickettsial infections	Rocky Mountain spotted fever, typhus fever and the typhus group, Q fever, rickettsialpox, and tick fevers caused by
	Rickettsiae
Sexually transmitted	Uncomplicated urethral, endocervical or rectal infections
infections	caused by Chlamydia trachomatis
	Nongonococcal urethritis caused by Ureaplasma urealyticum
	Lymphogranuloma venereum caused by Chlamydia
	trachomatis
	Granuloma inguinale caused by Klebsiella granulomatis
	Uncomplicated gonorrhea caused by Neisseria gonorrhoeae

FDA-approved indications	Applicable conditions or diseases
mulcations	Chancroid caused by Haemophilus ducreyi.
	Chanciold caused by Trachiophilius ducicyl.
Respiratory tract infections	Respiratory tract infections caused by Mycoplasma pneumoniae
	Psittacosis (ornithosis) caused by Chlamydophila psittaci
	Doxycycline is indicated for treatment of infections caused by
	the following micro- organisms, when bacteriological testing
	indicates appropriate susceptibility to the drug:
	Respiratory tract infections caused by Haemophilus influenzae
	Respiratory tract infections caused by Klebsiella species
	Upper respiratory infections caused by Streptococcus
	pneumoniae
Specific bacterial	Relapsing fever due to Borrelia recurrentis
infections	Plague due to Yersinia pestis
	Tularemia due to Francisella tularensis
	Cholera caused by Vibrio cholerae
	Campylobacter fetus infections caused by Campylobacter fetus
	Brucellosis due to Brucella species (in conjunction with streptomycin)
	Bartonellosis due to Bartonella bacilliformis
	Bartonenosis due to Bartonena bacimornis
	Doxycycline is indicated for treatment of infections caused by
	the following gram- negative microorganisms, when
	bacteriological testing indicates appropriate susceptibility to
	the drug: Escherichia coli, Enterobacter aerogenes, Shigella
	species, Acinetobacter species, urinary tract infections caused
	by Klebsiella species
Ophthalmic infections	Trachoma caused by Chlamydia trachomatis
	Inclusion conjunctivitis caused by Chlamydia trachomatis
Anthrax including	Anthrax due to Bacillus anthracis, including inhalational
inhalational anthrax	anthrax (post-exposure)
(post-exposure)	
Alternative treatment for	Syphilis caused by Treponema pallidum
selected infections when	Yaws caused by Treponema pallidum subspecies pertenue
penicillin is	Vincent's infection caused by Fusobacterium fusiforme
contraindicated	Actinomycosis caused by Actinomyces israelii
111 11 11 11 11	Infections caused by Clostridium species
Adjunctive therapy for	Not applicable
acute intestinal amebiasis	

V. Dosage and Administration

Drug Name	Indication	Dosing Regimen	Maximum
			Dose
Doxycycline hyclate (Acticlate), doxycycline hyclate delayed- release (Doryx, Doryx MPC)	All indications listed in the FDA-approved indications section	Acticlate Adults: 200 mg PO on the first day of treatment (administered 100 mg every 12 hours) followed by a maintenance dose of 100 mg PO daily. In the management of more severe infections (particularly chronic infections of the urinary tract), 100 mg PO every 12 hours is recommended. For all pediatric patients weighing less than 45 kg with severe or life-threatening infections (e.g., anthrax, Rocky Mountain spotted fever): 2.2 mg per kg of body weight administered every 12 hours PO. For pediatric patients with less severe disease (greater than 8 years of age and weighing less than 45 kg): 4.4 mg per kg of body weight PO divided into two doses on the first day of treatment, followed by a maintenance dose of 2.2 mg per kg of body weight (given as a single daily dose or divided into two doses) PO. For pediatric patients weighing over 45 kg: the usual adult dose should be used. Doryx Adults: 200 mg PO on the first day of treatment (administered 100 mg every 12 hours) followed by a maintenance dose of 100 mg PO daily. In the management of more severe infections (particularly chronic infections of the urinary tract),	200 mg/day Doryx MPC: 240 mg/day

	100 mg every 12 hours PO is	Dose
	recommended. For children above eight years of age: The recommended dosage schedule for children weighing 45 kg or less is 4.4 mg/kg of body weight PO divided into two doses on the first day of treatment, followed by 2.2 mg/kg of body weight given as a single daily dose or divided into two doses PO on subsequent days. For more severe infections up to 4.4 mg/kg of body weight may be used. For children over 45 kg, the usual adult dose should be used.	
	Doryx MPC Adults: 240 mg PO on the first day of treatment (administered 120 mg every 12 hours) followed by a maintenance dose of 120 mg daily. In the management of more severe infections (particularly chronic infections of the urinary tract), 120 mg every 12 hours PO is recommended. For all pediatric patients weighing less than 45 kg with severe or life threatening infections (e.g., anthrax, Rocky Mountain spotted fever): 2.6 mg per kg of body weight administered PO every 12 hours. For pediatric patients with less severe disease (greater than 8 years of age and weighing less than 45 kg): 5.3 mg per kg of body weight divided into two doses on the first day of treatment PO,	

Drug Name	Indication	Dosing Regimen	Maximum Dose
		of 2.6 mg per kg of body weight (given as a single daily dose or divided into twice daily doses) PO. For pediatric patients weighing over 45 kg: the usual adult dose should be used.	
Doxycycline capsule (Oracea)	Inflammatory lesions (papules and pustules) of rosacea	40 mg PO QD	40 mg/day

VI. Product Availability

Drug Name	Availability
Doxycycline hyclate	Tablets: 75 mg, 150 mg
(Acticlate)	Capsules: 75 mg
Doxycycline hyclate	Delayed-release tablets: 50 mg, 200 mg
delayed-release tablets	Delayed-release tablets (MPC): 120 mg
(Doryx, Doryx MPC)	Generic: 50 mg, 75 mg, 100 mg, 150 mg, 200 mg
Doxycycline (Oracea)	Capsules: 40 mg

Reviews, Revisions, and Approvals	Date	P&T Approval
Policy split from CP.PMN.51 Tetracycline Antibiotics (Solodyn, Doryx, Oracea) to address all indications for the featured drugs For acne vulgaris and rosacea, modified criteria related to trial and failure of PDL oral antibiotics to specifically require tetracycline class of antibiotics, one of which must be immediate-release doxycycline, as they are considered first-line for systemic antibiotic therapy; for rosacea, modified criteria to require failure of 2 (instead of 1) oral antibiotics; Created criteria sets for other FDA approved indications of Doryx, including malaria prophylaxis Converted to new template Added no documentation of hypersensitivity to tetracyclines per PI Added duration of trial to requirements related to trial and failure of topical therapies for clarity Removed age requirement since tetracycline antibiotics on the PDL are not subjected to age restrictions For acne, modified duration of trial of oral antibiotics from ≥ 6 weeks to ≥ 4 weeks; modified duration of approval for Doryx/Doryx MPC from 16 weeks to 12 weeks since PI does not specify time frame of use and per American Academy of Dermatology, systemic antibiotic	03.17	Date 05.17
use should be limited to shortest possible duration, typically 3 months,		
to minimize development of bacterial resistance		
Updated references 2Q 2018 annual review: no significant changes from previously approved corporate policy; policies combined for commercial and Medicaid lines of business Commercial: split from CP.CPA.210 doxycycline hyclate (Acticlate, Doryx), doxycycline (Oracea), and minocycline (Solodyn); rosacea: modified criterion pertaining to failure of immediate-release doxycycline to require medical justification supporting inability to use immediate-release doxycycline; added failure of a ≥ 4 week trial of one additional preferred oral tetracycline antibiotic, unless clinically significant adverse effects are experienced; modified initial/continued approval duration from length of benefit to 16 weeks of treatment per limitations stated in PI; Doryx and Acticlate requests: modified criterion pertaining to failure of immediate-release doxycycline to require medical justification supporting inability to use immediate-release doxycycline; added a requirement for failure of one additional	01.29.18	05.18

Reviews, Revisions, and Approvals	Date	P&T Approval Date
preferred tetracycline antibiotic for Doryx 100, 150 mg; separated acne vulgaris and prophylaxis of malaria from other FDA approved indications and created specific criteria set for each; modified initial/continued approval duration from length of benefit to specific approval duration per indication; Medicaid: Added Acticlate to the policy; Removed criteria related to hypersensitivity to tetracyclines per safety guidance; Rosacea: added age requirement; removed criteria related to topical treatments; Acne vulgaris: removed criteria related to topical treatments; added max dose; Other FDA approved indications: added max dose. Important Reminder

This clinical policy has been developed by appropriately experienced and licensed health care professionals based on a review and consideration of currently available generally accepted standards of medical practice; peer-reviewed medical literature; government agency/program approval status; evidence-based guidelines and positions of leading national health professional organizations; views of physicians practicing in relevant clinical areas affected by this clinical policy; and other available clinical information. The Health Plan makes no representations and accepts no liability with respect to the content of any external information used or relied upon in developing this clinical policy. This clinical policy is consistent with standards of medical practice current at the time that this clinical policy was approved. "Health Plan" means a health plan that has adopted this clinical policy and that is operated or administered, in whole or in part, by Centene Management Company, LLC, or any of such health plan's affiliates, as applicable.

The purpose of this clinical policy is to provide a guide to medical necessity, which is a component of the guidelines used to assist in making coverage decisions and administering benefits. It does not constitute a contract or guarantee regarding payment or results. Coverage decisions and the administration of benefits are subject to all terms, conditions, exclusions and limitations of the coverage documents (e.g., evidence of coverage, certificate of coverage, policy, contract of insurance, etc.), as well as to state and federal requirements and applicable Health Plan-level administrative policies and procedures.

This clinical policy is effective as of the date determined by the Health Plan. The date of posting may not be the effective date of this clinical policy. This clinical policy may be subject to applicable legal and regulatory requirements relating to provider notification. If there is a discrepancy between the effective date of this clinical policy and any applicable legal or regulatory requirement, the requirements of law and regulation shall govern. The Health Plan retains the right to change, amend or withdraw this clinical policy, and additional clinical policies may be developed and adopted as needed, at any time.

This clinical policy does not constitute medical advice, medical treatment or medical care. It is not intended to dictate to providers how to practice medicine. Providers are expected to exercise professional medical judgment in providing the most appropriate care, and are solely responsible for the medical advice and treatment of members. This clinical policy is not intended to recommend treatment for members. Members should consult with their treating physician in connection with diagnosis and treatment decisions.

Providers referred to in this clinical policy are independent contractors who exercise independent judgment and over whom the Health Plan has no control or right of control. Providers are not agents or employees of the Health Plan.

This clinical policy is the property of the Health Plan. Unauthorized copying, use, and distribution of this clinical policy or any information contained herein are strictly prohibited. Providers, members and their representatives are bound to the terms and conditions expressed herein through the terms of their contracts. Where no such contract exists, providers, members and their representatives agree to be bound by such terms and conditions by providing services to members and/or submitting claims for payment for such services.

Note:

For Medicaid members, when state Medicaid coverage provisions conflict with the coverage provisions in this clinical policy, state Medicaid coverage provisions take precedence. Please refer to the state Medicaid manual for any coverage provisions pertaining to this clinical policy.
