Description
Phentermine (Adipex-P®, Lomaira™) is a sympathomimetic amine with pharmacologic activity similar to the amphetamines.

*For Health Insurance Marketplace (HIM), if request is through pharmacy benefit, brand Adipex-P is non-formulary and should not be approved using these criteria; refer to the formulary exception policy, HIM.PA.103. Lomaira is a plan exclusion and is not covered.

FDA Approved Indication(s)
Adipex-P and Lomaira are indicated in the management of exogenous obesity as a short term adjunct (a few weeks) in a regimen of weight reduction based on exercise, behavioral modification and caloric restriction in the management of exogenous obesity for patients with an initial body mass index (BMI) of:
- 30 kg/m² or greater (obese), or
- 27 kg/m² or greater (overweight) in the presence of at least one weight-related comorbidity such as hypertension, type 2 diabetes mellitus, or dyslipidemia.

The limited usefulness of agents of this class, including Adipex-P and Lomaira, should be measured against possible risk factors inherent in their use.
